03 / SPECTRAL LABS

AI agent tokens, staking and rewards.

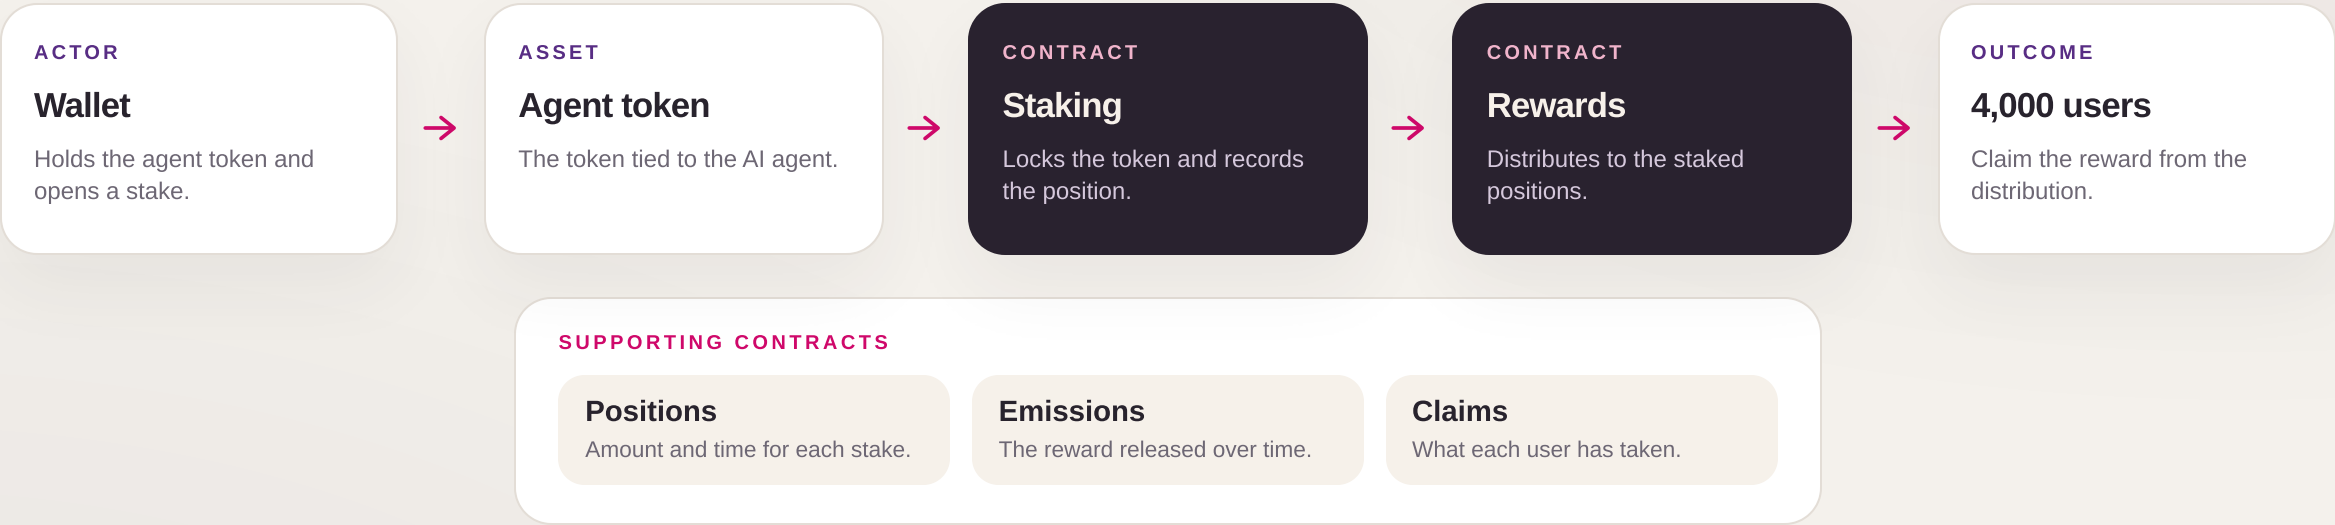

Agent tokens » Staking » Rewards » Supporting contracts

Spectral Labs reached a \$200 million market cap. Its AI agent tokens reached \$80 million at their peak. Staking and supporting contracts distributed rewards to 4,000 users.

How the rewards moved.

Wallet » Agent token » Stake » Distribution » Claim

A wallet holds the agent token and stakes it. The distribution pays the reward. Positions, emissions and claims sit beside the stake.

Tokenized deposits.

Issue » Hold » Move » Redeem

Designed for business clients of medium-sized banks. The deposit stays at the bank. The token is the client's record of that deposit.

MEDIUM BANK

Deposit account

Client funds stay on the bank's books.

The account is the source of the token.

Issued only against a deposit.

The token matches what the bank holds.

CONTRACT

Tokenized deposit

Issue

Minted when the deposit is taken.

Transfer

Moved between business clients.

Redeem

Returned to the bank, deposit released.

BUSINESS CLIENT

Treasury

Holds the token.

A working balance of the deposit.

Moves it to another client.

Then redeems it back to the bank.
